Welcome to

# Digital Fingerprint

At Digital Fingerprint, we believe in fostering a culture of collaboration, innovation and continuous growth. This guide is your guide to navigating our exciting work environment, and learning about all our services and work we do.

# Our Vision

We aspire to be the leading provider of reliable and innovative communication solutions in Maysan, dedicated to enhancing connectivity and security for all sectors of society. Our commitment is driven by the following core principles:

## **1. Providing Stable Internet Service via Wireless:**

- We aim to deliver uninterrupted and high-speed wireless internet services, ensuring that our customers, whether individuals or businesses, can stay connected with the world seamlessly.

## **2. Managing the Operation of FTTH Networks:**

- We are committed to efficiently managing and operating Fiber-to-the-Home (FTTH) networks, providing our customers with cutting-edge internet technology that guarantees speed, reliability, and future-proof connectivity.

### **3. Serving the Oil Companies, Private, and Government Sectors:**

- Our goal is to be the trusted internet service provider for the oil industry, as well as the private and government sectors, offering tailored solutions that meet their specific needs for security, stability, and efficiency.

### **4. Organizing, Installing, and Equipping Surveillance Camera Systems:**

- We strive to enhance the safety and security of our communities and businesses by providing top-of-the-line surveillance camera systems, from design to installation and ongoing support.

### **5. Being the Major Internet Provider in Maysan:**

- As the leading internet provider in Maysan, we take pride in our ability to connect the region with the rest of the world, playing a crucial role in the digital transformation and economic growth of the area.

### **6. Creating Job Opportunities for Maysan's Society:**

- We are dedicated to supporting the local economy by creating job opportunities across various sectors within the company, contributing to the socio-economic development of Maysan and empowering its people.

# OUR SERVICE

## **Internet service provider**

We provide top-tier fiber and wireless internet services designed to meet the diverse needs of individuals, businesses, and communities. Our services combine the speed and reliability of fiber with the flexibility and convenience of wireless, ensuring seamless connectivity no matter your location or requirements.

## **Security Systems Service**

Our Camera Security Systems service offers state-of-the-art surveillance solutions designed to protect your home, business, and assets. With advanced technology, real-time monitoring, and customizable features, our systems provide the security and peace of mind you need.

# Project References

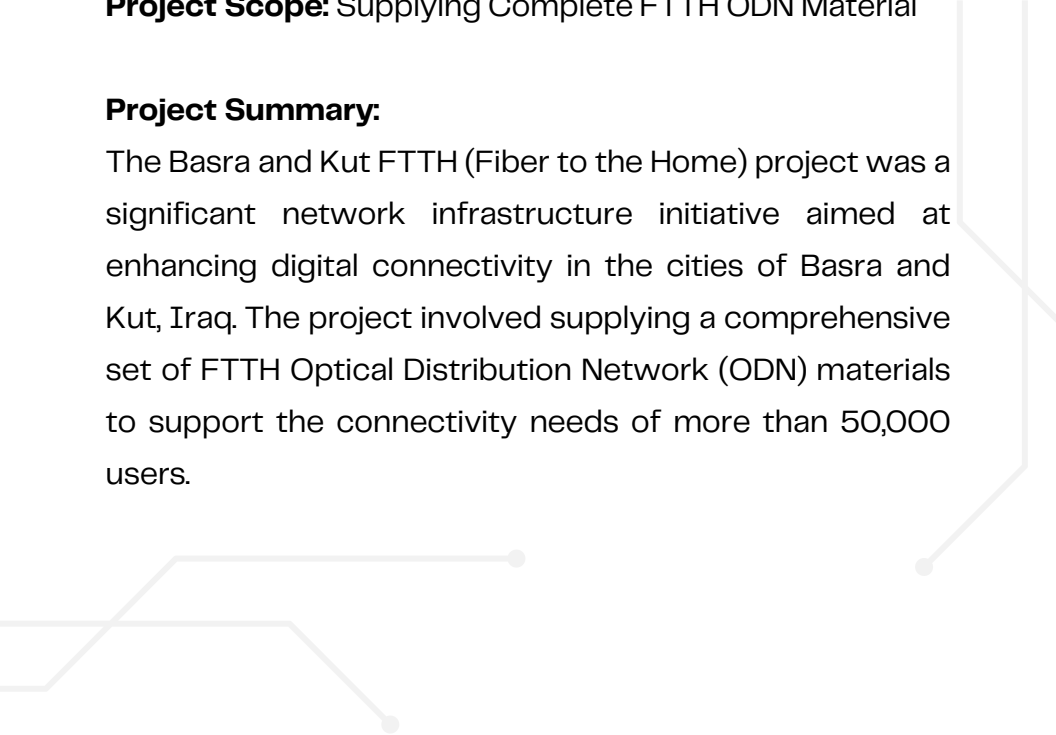

## 1- FTTH Project

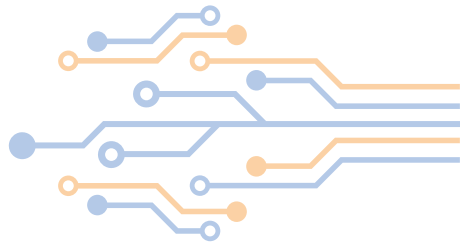

**Location:** Basra, Kut, Iraq

**Project Scope:** Supplying Complete FTTH ODN Material

### **Project Summary:**

The Basra and Kut FTTH (Fiber to the Home) project was a significant network infrastructure initiative aimed at enhancing digital connectivity in the cities of Basra and Kut, Iraq. The project involved supplying a comprehensive set of FTTH Optical Distribution Network (ODN) materials to support the connectivity needs of more than 50,000 users.

## 2- ITPC Fiber Optic Cable Supply Project

**Client:** ITPC (Iraq Telecommunications and Post Company)

**Project Scope:** Supply of Fiber Optic Cables

### **Project Summary:**

The ITPC Fiber Optic Cable Supply project involved the provision of approximately 5,000 kilometers of fiber optic cables by FiberHome, a leading global provider of optical communication equipment. This project was critical for the development of Iraq's national backbone and metro networks, both of which are integral components of the country's telecommunications infrastructure.

### **3- Baghdad Karkh FTTH Project**

**Location:** Baghdad, Iraq

**Project Scope:** Supply of Complete FTTH ODN Materials

**Project Summary:**

The Baghdad Karkh FTTH (Fiber to the Home) Project was a major initiative aimed at expanding and modernizing the digital infrastructure in the Karkh district of Baghdad, Iraq. The project involved the supply of comprehensive FTTH Optical Distribution Network (ODN) materials necessary for the deployment of fiber optic networks capable of serving more than 100,000 users.

## 4- National FTTH Project by Earthlink Telecommunications

**Client:** Earthlink Telecommunications

**Scope:** Supply of Complete FTTH ODN Materials

### **Project Description:**

The National FTTH (Fiber to the Home) Project was undertaken by Earthlink Telecommunications, one of Iraq's leading telecommunications service providers. The project involved the supply of comprehensive FTTH Optical Distribution Network (ODN) materials necessary for deploying a robust fiber optic network designed to serve around 100,000 users across Iraq.
